JOURNAL OF THE KYORIN MEDICAL SOCIETY
Vol. 34 2003 No. 4

CONTENTS

Review Articles
Ethics in Medical Research: Guidelines and Ethics Committee........................................ Shinobu GAMOU····· (313)

Images of Medicine
Non-Invasive Assessment of the Origin of Arrhythmia Using a New Ultrasonographic Technique-Tissue Tracking Imaging......................................................... Konomi SAKATA,
Takanori IKEDA, Masayuki YOTSUKURA and Hideaki YOSHINO····· (319)

Original Articles
Evaluation of embryonic factor and uterine factor scores, their relationship to age, and determination of adequate number of transferred embryos by using mathematical models of embryo-transfer...........................................Joji YOSHIDA····· (320)

Roentgenographic Findings and Bone Mineral Density in the Stem Area After Cementless Total Hip Arthroplasty................................................................. Kunitomo MINAKAWA····· (330)

Spinal cord monitoring for deterioration of motor function caused by compression of the spinal cord
—Comparison of the response between compound muscle action potentials and peripheral nerve potentials................................................................. Michinori OHTA····· (340)

Effectiveness of Uterine Artery Embolization in the Treatment for Uterine Leiomyoma................................................................. Noriko SUZUKI····· (351)

Role of MR imaging in Preoperative Evaluation of the Extension of the Endometrial Carcinoma................................................................. Makoto HIGASHI····· (360)

Frequency and Effects on Neonatal Growth of Birth Weight Discordance in triplet gestations................................................................. Mai MOMOMURA····· (371)
