The Japan Society of Medical Entomology and Zoology

Proceedings of the 43rd Annual Meeting of the Northern Region

Towada, September 6, 1996

Special Lecture
Ticks-rickettsioses interface

Fujita, H. (Ohara Research Laboratory, Ohara General Hospital) .....153

Contributed Papers
1. Analysis of fatalities caused by hornet stings in Hokkaido

Inomata, H. (Hokkaido Obihiro Health Center),

K. Takahashi (Hokkaido Institute of Public Health) .....153

2. An indirect haemagglutination inhibition test as a simple method for
detection of tularemia polysaccharide antigen from decomposed samples

Fujita, H. (Ohara Research Laboratory, Ohara General Hospital) .....153

3. The epidemiological study of tick-borne encephalitis in Hokkaido

Takahashi, K., T. Ito (Hokkaido Institute of Public Health),

T. Takeda, I. Takehama, N. Hashimoto (Hokkaido University) .....153

4. Mode of transmission of Lyme borreliosis spirochetes by infestation with
Taiga tick

Miyamoto, K., Y. Hashimoto (Asahikawa Medical College) .....154

5. Phylogeny of tick vectors for Lyme disease inferred by analyzing
sequences of nuclear rDNA internal transcribed spacer 2

Nakao, M. (Asahikawa Medical College),

M. Yabuki, M. Fukunaga (Faculty of Pharmacy and
Pharmaceutical Sciences, Fukuyama University) .....154
