Welcome to the Special Section on Advanced Imaging and Computer Graphics Technology

Editor-in-Chief Nobuhiko Mukai

It is a great pleasure to introduce the special section "Advanced Imaging and Computer Graphics Technology" in the Transactions on Media Technology and Applications (MTA). The objective of the special section is focus on advanced technologies for imaging and computer graphics, and their applications. Initially, we called for papers in the following areas:

- Image / video processing
- Computer vision
- Pattern recognition
- Artificial Intelligence
- Computer graphics
- Physical simulations
- Visualization
- Animation
- Multimedia applications
- Virtual reality
- Augmented reality
- Big data
- Others

With the great effort made by the associate editors in the guest editorial committee and anonymous reviewers, we have finally selected six high quality papers including one invited paper contributed from the leading researchers in the field.

We are very grateful to all the authors who have submitted their excellent works to this issue and all the guest editors and reviewers. We hope this special section will promote research in each field.
