Journal of the Physics Education Society of Japan
Vol. 50, No.5 (2002)

CONTENTS

<Hokkaido Section>
Return the Big Surf ................................................................. Toshio Nagata ........ 289

Symposia
What High School Expects to University and What University Expects to High School
Consderation of Physics Curriculum for the New Course of Study
............................................................................................... Eizo Ohno ........ 297

Improving High-School Physics Education along the Direction of the New Course of Study
............................................................................................... Hirotaka Yamada .... 299

Reports of Science Festival
Make Room for Work-Shop in Science Museum .................................. Shin-ichi Ito .......... 301
A Report of Science Festival in Kushiro - Open-Air Science Exhibits
............................................................................................... Mutsuharu Yamamoto .... 303

Tool for Science Education
Project of Making a Card-Game "Kagaku-oh" ...................................... Jun-ichi Kawada .... 305
Making "Luminous Antenna" and Demonstration of Resonance ............ Yo Sugahara .......... 307
The Admission-Office Entrance Examination at Hokkaido University ................................. Midori Yamagishi .... 309

Anti-Science, Anti-Rationalism and Science Education
Science Teaching and the Nature of Science ...................................... Masanao Kitamura .... 313
The Wave of e-Learning Is Coming to Universities in the World .......... Toshiyuki Hosokawa .... 317
Consideration on the Coulomb's Law and the Electrical Force
............................................................................................... Takashi Okazaki and Taro Endo .... 321
A Trial of the Simple Control with Graphing Calculators
............................................................................................... Kazuyuki Koizumi, Makoto Tokuda and Kiyoshi Matsuki .... 324
Comparison of Japanese and British Curriculum of Physics Eduction
............................................................................................... Mitsuru Sato and Masanobu Hirano .... 327

<Niigata Section>
Enrolment of Physics under the New Course of Study ......................... Akira Sakai .......... 331
Selection of Text-Books for the New Course of Study in Correspondence Schools
............................................................................................... Hiroshi Endo .......... 335
General Physics for High-School Students ......................................... Masanori Homma ...... 337
Is the Simulation Effective? ............................................................. Daikuke Shiga .......... 340
Are the Newton's Equations of Motion Important? .............................. Naoki Mizoguchi .... 342
What is the Matter of Physics Education in the 21st Century? What Shall We Do?
............................................................................................... Masanori Homma .......... 344

<Tohoku Section>
What Is Necessary in High School education ....................................... Shin-etsu Koseki .... 349
Problems on Enforcing the New Course of Study and Trial of Raising the Learning Ability
............................................................................................... Manoru Bun-ya .......... 351
Considering New "Curriculum=Order" in My School ............................. Yukiko Nakoshi .... 354
What can We Do with Two Units per Year of Teaching Physics? .......... Minoru Kudo .......... 355
Response to Enforcement of Five School-Days a Week ......................... Mutsuru Sasaki .... 357
Present Situation of High Schools Making a Large Reform .................... Yoshihiro Sasano .... 359
Deterioration of Physics Education with the New Course of Study ........... Tomokazu Watanabe .... 360
