Forum: Experiments on the physicality

Wataru TERAMOTO: The roles of visual proprioceptive in formation in our perception revealed by the experiments with virtual reality ............................................ 83

Masaya MISAKI: fMRI experiment in interaction between body image and spatial recognition .......... 90
Kazunori SHIDOJI: Movement and body—Motor programming— ................................... 95

Taro MAEDA: Human body use interface—The study of parasitic humanoid— ......................... 100

Summaries of Awarded Presentations at the 23rd Annual Meeting

Shoko HONDA, Mie GANGL, Yasuhiro HORIUCHI, Hiroshi ISHIKANE, and Masao TACHIBANA:
Triggering of escape behavior by oscillatory synchronized discharges of retinal ganglion cells in frogs ............................................................................. 107

Toshinide IMARUOKA, Jun SAIKI, and Satoru MIYAUCHI:
Effects of object occlusion on brain activity for representation of a dynamic scene ............. 109

Yui YAMAGUCHI and Ken SHIINA: Stronger influence of ground on the perceptual lightness of a space surrounded by figure-ground scission patterns ......................................................... 111

Kenchi HOSOKAWA, Satoko OHTSUKA, and Takao SATO:
Change detection from motion parallax ..................................................................... 113

Ayako SANEYOSHI, Chikashi MICHIMATA, and Keiji SANEYOSHI:
The role of depth information in object recognition ...................................................... 115

Atsunori ARIGA and Kazuhiko YOKOSAWA:
The transitions of time-dependent performance in a task ............................................. 117

Takeo KONDO, Shiori AOYAMA, Rie FUKUMOTO, Yuri SAITO, and Tamotsu TOSHIMA:
Cue availability changes the orbitofrontal activation for olfactory stimuli
— A NIRS imaging study — ............................................................................. 119

Noriichi KITAGAWA and Yuka IGARASHI: Tickle sensation induced by hearing a sound .... 121

Tessei KOBAYASHI, Kazuo HIRAKI, and Toshikazu HASEGAWA:
Auditory-visual crossmodal numerosity matching by infants and young children .............. 123

Yumiko OTSUKA, So KANAZAWA, Masami K. YAMAGUCHI, Alice J. O’TOOLE, and
Hervé ABDI: The effect of motion information on infants’ recognition of unfamiliar faces 125

Takayuki KAWASHIMA and Takao SATO:
Factors affecting the perception of multiple simultaneous voices .................................... 127

Hisae ITO: Perception of a framed solid figure replicating a fanfold “Mach’s book” .............. 129

Takahiro KAWABE and Kayo MIURA:
Searching for luminance-defined objects through moving apertures ................................ 131

Chihiro ASANOI and Yoshihisa OSADA: The perception of a Point Light Walker across a slit
— The perception of the “human likeness—” ...................................................... 133

Hanako IKEEDA, Randolph BLAKE, and Katsumi WATANABE:
Eccentricity dependency of the perception of biological motion ....................................... 135

Announcements ........................................................................................................... 138
