Chromosome of *Psathyropus tenuipes*

Provided by Watanabe *et al.* (pp. 51-53 in this journal).

Species: *Psathyropus tenuipes*
Family: Sclerosomatidae
Order: Opiliones
Class: Arachnida
Japanese name: Hitoharizatomushi

**Front cover:**
Widespread in Japan but is coastal in the south and enlisted in the Red List of Japan 2006 at the rank near threatened (NT). The harvestman harbors B-chromosomes in high frequency and high number.
