TRANSACTIONS OF THE SOCIETY OF HEATING,
AIR–CONDITIONING AND SANITARY
ENGINEERS OF JAPAN

CONTENTS

Scientific Paper
Demonstration of Solar Heating and Cooling System in Office Building
~ Analysis and Evaluation of Performance for Cooling and Heating Period ~
   by Makiko UKAI, Takuya SHINODA, Kazuyuki KATO, Hideki TANAKA, Mika YOSHINAGA and Masaya OKUMIYA  1

Experimental Study on Disinfectant Concentration Control of Reclaimed Water
Reduction of Residual Chlorine in the Pipe
   by Masaki IMAI, Seishi OKADA and Zhi ZHAO  11

Thermal Environment Simulation Using Heat Response on Static Flow Field
Part 4—Sensitivity Measurement of Flow Field Change to Scalar Response under Isothermal Condition
   by Kyosuke HIYAMA, Weirong ZHANG, Shinsuke KATO and Hideaki NAGANO  19

Development of Wind Decontamination System
Part 2—Development of Formulas for the Mean Convective Heat Transfer Coefficient of
   Each Human Body Segment
   by Cong LI, Eunsu LIM and Kazuhide ITO  31

Positive Analysis of the Demand Factor of the Air-Conditioning Machine Markets of Our Country
   by Toshiyuki MOTOMURA  39

Analysis of Indoor Air Environment Based on New Ventilation Index - Net Escape Velocity
Part 2—Application of NEV Concept to Three-dimensional Flow and Contaminant Distribution Field
   by Eunsu LIM and Kazuhide ITO  47

Technical Paper
CFD Simulation of Natural Ventilation Through Shafts and Block Effect of Platform Doors in a Subway Station
   by Yasushi KONDO and Suguru ENDO  57

Study on the Relation between the Functional Obstacles and the Maintenance Conditions of
Elemental Technologies in Eco-Friendly Buildings
   by Masahiko OKI, Masakazu MORIYAMA and Hideki TAKEBAYASHI  65

The Society of Heating, Air-Conditioning
and Sanitary Engineers of Japan
1–8–1, Kitashinjuku, Shinjuku–ku,
Tokyo, Japan
