CONTENTS

Scientific Paper
Study on Outdoor Air-Cooling Systems for Data Centers
   by Yosuke UDAGAWA, Keisuke SEKIGUCHI, Masahide YANAGI, Wataru FUKUMITSU and Kiyoshi SAITO 1

Research of Optimum Chiller System Configuration Searching Methods Application of
the PSO (Particle Swarm Optimization) Methods for Optimum Chiller
Configuration Searching Based on LCC (Life Cycle Cost)
   by Noriyasu MAEHARA and Yoshiyuki SHIMODA 11

Study on Ground Source Heat Pump System using Cast in Place Concrete Foundation
—The Possible Use of Shallow Heat Exchanger—
   by Hisashi WAKAYAMA, Takao KATSURA, Katsunori NAGANO and Nobutaka SATO 21

Numerical Simulation on Weak Natural Convection Field using Dynamic LES Model Validation of
LES Models and Examination of Grid Resolution
   by Hiroki ONO, Koji SAKAI and Ryoichi KAJIYA 29

Test Method of Heat Exchange Efficiency for Mechanical Ventilation Unit with Heat Storage Alternating
Intake and Exhaust Periodically
   by Sayaka MURATA and Akira FUKUSHIMA 39

Technical Paper
Study on Radiators Made of Plastic Pipes
Part 3——Estimation of Indoor Thermal Environment in a Model House where the Plastic Radiator is Installed
   by Hiroyasu SHIRATO, Kazuhiko TOMITA, Hideo HOSHINA and Tomoaki IURA 47

List of Technical Papers Presented at 2012 SHASE Annual Meeting 55

The Society of Heating, Air-Conditioning and Sanitary Engineers of Japan
