CONTENTS

Scientific Paper
Study on Database Construction of Equipment Characteristics of Air Conditioning for Energy Simulation
Part 1 — Database and Sensitivity Analysis of the Conveyance Apparatus
by Koichi SHINAGAWA, Shuzo MURAKAMI, Hisaya ISHINO, Takashi YANAI and Hiroshi ABE 1

Dynamic Insulation System Applied to Window
Part 2 — Thermal Sensational Analysis and Contribution Ratio of Indoor Climate
by Daisuke KAWAHARA and Shinsuke KATO 11

Study on Toward Practical Implementation of Ice and Water Transport System for District Cooling
— Expansion of Piping Design Data and Proposal of Measurement and Control Technology —
by Yuta INADA, Tadahiko IBAMOTO, Masashi MOMOTA, Takumi MIYANAGA and Naoki KEMMOTSU 19

Linkage Between Information Related to a Person’s Location to a BEMS Application
with an Analysis of the Operation Results
by Soichi NAKAZATO, Tadahiko IBAMOTO, Ryuji YANAGIHARA, Masashi MOMOTA, Yuta INADA and Yuuki NAGUMO 31

Reduction in Electric Power Consumption for Thermal Storage Air Conditioning System
during Daytime by Application of Discharged Cold Water to Cooling Water
Part 3 — Application to Air Cooled Refrigerator System with Heat Storage Tank
by Yoshiyuki KAMIYA and Satoshi MIYAGI 39

Simulation Method for Identifying Fixture Discharge Characteristics and Carrying
Performance in Horizontal Drain Pipes of Water-Saving Toilets
Part 2 — Proposal and Verification of a Simulation Method for Identifying the Performance of Carrying
Waste Substitutes in Horizontal Drain Pipes
by Kazuya AKIYAMA, Masayuki OTSUKA, Hiroshi SHIGEFUJI and Takafumi MATSUO 49

Technical Paper
New calculation method for Water Consumption (Water Load Calculation)
— Outline of Water Load Calculation and Water Consumption Calculation Example for Designs in an Office Building —
by Shinji KOSAKA 61
