TOHKETSU OYOBi KANsO KENKYUKAI KAISHI
(Japanese Journal of Freezing and Drying)

Contents of Vol. 30, 1984

Special Lecture (Synopsis paper presented at The 30th Annual Meeting, April 1984, Tokyo)
Preferential Hydration Phenomena of Proteins. ........................................Kunihide GEKKO.....(1)

Articles (Synopsis papers presented at The 30th Annual Meeting, April 1984, Tokyo)
The Selective Viability and Storage Condition of Pediococcus pentosaceus in Chinese Yeasts from Asia .........................Takeo SUMIKAWA, Tai UCHIMU RA, Sanae OKADA,
Naohiro OHARA and Michio KOZAKI.....(7)

Preservation of Activities of Bacteria by L-Drying......................Setsuko UCHIDA, Susumu
MAEDA, Ryoko KAIHARA, Minoru HONDA, Kenji SUNAGAWA and Yoichi MIKAMI......(11)

Compounda Protecting L-Dried Cultures from Mutation (II); Preservation of DNA Strand
Breakage in L-Dried Escherichia coli by Thiourea, Adonitol and Cysteine
........................................Takeshi SAKANE, Ko IMAI and Isao BANNO......(17)

Cryopreservation of Microalgae in Liquid Nitrogen—Survival of Algal Cultures after Freezing—
........................................Makoto M. WATANABE, Fumie KASAI, Takehiko HIWATARI,
Shoichiro SUDA and Tokio NEI......(23)

Cryopreservation of Scenedesmus acutus and Pediastrum duplex in Liquid Nitrogen—Survival
and Growth after Freezing................................Takehiko HIWATARI, Fumie KASAI,
Makoto M. WATANABE and Tokio NEI......(27)

Freezing Injury to Respiratory System of Yeast Cells
.....................................Yuki MORI, Hiroko SUZUKI and Tokio NEI......(32)

Escherichia coli B Membrane Stability Paralleled The Tolerance of It to Freezing
......................................Hiroshi SOUZU......(36)

A Study for The Mechanism of Freezing and Thawing of Heterogeneous Systems
..................................Norio MURASE, Tokuko WATANABE and Kinji GONDA......(39)

Ice Build-Up Patterns on The Refrigerated Vapor Trap of Freeze Dryers and Deterioration
of The Trap Capacity by Ice Layer Growth (Continued Report)
........................................Masakazu KOBAYASHI.....(43)

Application to The New Field of Freeze Dehydrated Products. (1) The Adsorption Ability
of The Freeze Dehydrated Starch....................Takao MOMOSE and Sigeru YAMAZAKI......(47)

Characteristics of Hydration of Protein with Cryoprotectant........Naofumi HANAFUSA......(52)
Seminar on “Freeze-Drying and Their Applications”
(Synthesis Papers at The Seminar of Japanese Society for Research of Freezing and Drying, November 1983, Osaka)

Special Topic
Conservation of Water-Logged Wood by Using The Freeze-Drying Method

Masaki SAWADA

Session 1.
Practical Methods for Preservation of Microorganisms

Isao BANNO

Long-Term Preservation of Fungal Cultures

Tatsuo YOKOYAMA and Tadayoshi ITO

Preservation Methods of Bacterial Indicators for Mutagenicity Tests

Yutaka SAKAMOTO and Osamu NAGAYABU

Preservation of Microbial Activities: Several Case Studies

Junko WATANABE, Sayoko SAWAIRI, Toru OKUDA and Hiromi B. Maruyama

Session 2.
New Techniques on Freeze Drying, Mainly on The Desorption of Unfrozen Water

Masakazu KOBAYASHI

The Retention of Volatile Flavors in Vacuum Drying

Hiroshi TAKAHASHI

Heat and Mass Transfer in Freeze-Drying

Ryozo TOEI and Masashi ASAEDA

Physical and Chemical Features of Low Molecular Materials on Freeze-Drying (Abstract)

Yasuo ARIMOTO

Freeze-Drying of Liquid Foods —Analysis of Initial Stage of Freeze-Drying and Study on Transition of Drying Rate—

Kozo NAKAMURA, Hitoshi KUMAGAI and Toshimasa YANO

Published Papers on Freezing and Drying (1983-1984)

Informations from The Society

Regulation for The Society and Instruction to Authors

List of Members in The Society

Japanese Society for Research of Freezing and Drying

(Office) Institute for Fermentation, Osaka, Juso-honmachi, Yodogawa-ku, Osaka 532, Japan
