

The Japanese Journal of Veterinary Research

- Instructions for Authors-

1. Scope

The Japanese Journal of Veterinary Research (JJVR) accepts *Regular Papers*, *Short communications*, and *Review Articles* principally related to veterinary science that are not published and not being considered for publication elsewhere. Manuscripts are selected for publication according to an editorial assessment of suitability and reports from referees. Papers will be rejected if ethics standards for the care and use of animals have not been adhered to. All animal experiments must have been approved by the institution the authors are affiliated with through evaluation by an appropriate committee.

2. Submission of manuscript

JJVR uses an Editorial Manager system to maintain the quality of the peer review process. The Editorial Manager is an online manuscript submission, review, and tracking system. Reviewing and processing is performed by the editorial board of JJVR or by outside experts. Approval by at least two independent reviewers followed by editor approval is required for acceptance of manuscripts. In the on-line submission, the authors should select one of each of 1) Article type, 2) Research category and 3) scientific field for each manuscript.

1) Article type:

- Regular Paper
- Short Communication
- Review Article

2) Research category:

- Experimental Research: Articles covering experimental studies in any category of the veterinary science field.
- Clinical Case Report: Articles covering novel research reported as case reports in clinical veterinary medicine of types of diseases, covering the relevant clinical and diagnostic issues.
- Regional Study: Articles covering wide aspects of epidemiology, control and prevention of infectious diseases, wildlife conservation and environmental toxicology, and others.

3) Scientific fields:

- Anatomy
- Physiology
- Biochemistry
- Pharmacology
- Microbiology
- Infectious diseases
- Parasitology
- Laboratory Animal Science and Medicine
- Internal Medicine

- Surgery
- Pathology
- Theriogenology
- Molecular Medicine
- Public Health
- Radiation Biology
- Toxicology
- Wildlife Biology and Medicine
- Veterinary Hygiene
- The other fields related to veterinary science*

*The livestock sciences, i.e., livestock farming, livestock breeding, and livestock feeding trials, are beyond the scope of the JJVR.

3. Format of manuscripts

The manuscript should be typed at 24 lines per A4 page-size with margins of about 25 mm on all sides. In the main text, consecutive page numbers on the footer and consecutive line numbers through all pages on the left margin of the page should be provided.

4. Preparation of manuscripts

- 1) The first page should include the title (which should begin with a capital letter), full name of authors, affiliations, and address(es) with the postal code of the institution(s) in which the work was done, as well as the name, address, and e-mail address of the corresponding author. The first page should also contain a running head not exceeding 40 letters.
- 2) The second page of a *Regular Paper* and *Review Article* should contain an abstract (250 words or less) and key words (5 or fewer, in alphabetical order). The second page of a *Short Communication* should contain an abstract (120 words or less) and key words (3 or fewer, in alphabetical order).
- 3) The body of the manuscript on and after the third page of a *Regular Paper* should in principle be divided into the following sections: Introduction, Materials and Methods, Results, Discussion, Acknowledgements, and References. For *Short Communication*, captions such as Introduction, Materials and Methods, and Results should not be used, and References should follow the text.
- 4) Proper nouns should begin with a capital letter. The scientific names of animals, plants and microorganisms must be italicized.
- 5) Abbreviations, except those listed in Item 6, should be written in parentheses after the fully spelled out word(s) at the first appearance in the manuscript.
- 6) In the manuscript, Arabic numbers should be used for quantities. As a rule, units and abbreviations should conform to the following examples: M, mM, μ M, %, m, cm, mm, μ m, nm, pm, cm², l, ml, μ l, nl, fl, kg, g, mg, μ g, ng, pg, hr, min, sec, msec, Hz, Bq, μ Bq, mBq, kBq, cpm, dpm, ppm, °C, J, Kj, lux, CPE, LD, T, xg.
- 7) The list of References should be arranged in alphabetical order by author's surname and numbered consecutively. The names of journals should be abbreviated as in PubMed, or spelled out for

journals not listed in PubMed. In the text, references should be cited with superscript numbers. The author is responsible for the accuracy and completeness of the references. The following are examples of references.

The following are examples of references.

(a) Journal

Holman RT, Wiwse HF, Smith AN. Essential fatty acid deficiency. *Am J Vet Res* 40, 221-230, 1976. doi: 10.2460/ajvr.1976.40.221.

(b) Book

Author(s)

Jones EC, Tayller QR. *Anatomy of the Cat*, 2nd ed. Vol. 1, Academic Press, London. pp. 20-35, 1976.

Section or chapter

Sligh EG. Neutral lipid storage disease. In: *Biochemistry of Lipids*, 5th ed. Deyer WJ, Nardly JH. eds. Univ. California Press, Berkley. pp. 471-476, 1992.

(c) In press

Takahashi Y. ... *Jpn J Vet Res* In press.

(d) Websites

Office of Pharmaceutical Industry Research. 2009. Clinical Development and Review Times of New Drugs in Japan. https://www.jpma.or.jp/opir/en/issue/en_rs_047/en_rs_047.html#/ [accessed on May 31, 2019].

- 8) Tables should not use vertical lines and each term or phrase should begin with a capital letter. Any explanation essential to the understanding of the table should be given as a footnote at the bottom of the table. References in footnotes should be designated by superscript letters in the order a, b, c, etc.
- 9) Figures must be created on separate pages from the text and must not be embedded in the text. The number of the figure (e.g. Fig. 2) and the name of the first author should be written on the figure. We encourage the authors to send us the highest quality figures possible. Their quality will be drastically reduced, if you do not supply your images in appropriate format and resolution.
- 10) Figure titles and legends must be typewritten on separate sheets.
- 11) Supplementary files will be published online without editing or typesetting. The file formats listed below may be used for supplementary files. .docx, MS Word documents; .xlsx, MS Excel Spreadsheet; .pptx, MS PowerPoint presentation; .jpg, JPEG image; .gif, Graphical image; .pdf, Adobe Portable Document Format; .mov, Quick Time; .wav, Sound; .txt, Plain ASCII.

5. Limitation of the number of pages

The length of papers, including tables, figures, and appendices, should not exceed 10 pages in PDF file for a *Regular Paper* or *Review Article*, and 6 pages in PDF file for a *Short Communication*.

6. Publication fee

For publication, authors will be charged JPY20,000 for a *Regular Paper* or *Review Article* not exceeding 10 pages in PDF file, and JPY20,000 for a *Short Communication* not exceeding 6 pages in PDF file.

Authors will be charged extra for the following:

- 1) English language revision when deemed necessary by the Editorial Board.
- 2) Type-setting of any portion of the text exceeding the length described above (JPY5,000 per page in PDF file).
- 3) Charges for reprints (only when requested by authors). The price list of reprints will be sent to the corresponding author with the galley proof.

You may choose to make the payment either by bank transfer or credit card. For bank transfers from countries other than Japan, the authors must pay the publication as well as the fees for the bank transfer of both the banks of the country of payment and Japan. The JJVR editorial office recommends payment by credit card for authors outside Japan. Please return the order form for page charges, and reprints in the attached file after filling in the blanks.

7. Copyright

The copyright of articles, which appear in The Japanese Journal of Veterinary Research, is held by the Editorial Committee. Authors may upload their articles to institutional or other non-commercial repositories and make them publicly available. When uploading their article to a repository, authors should include the DOI of the article corresponding to the official version so that the link to the official version can be made correctly.
