

## Procedure for contact of publishers

You can check the contact information of the publisher from "About the journal" on the TOP page of the subject journal.

The procedure for "About the journal" screen is shown below.

- (1) On the J-STAGE TOP page, click "Browse" to "All journals" or "All publishers".

If you know the journal title, you can also search from "Advanced Search".

Please search from the list in alphabetical order.

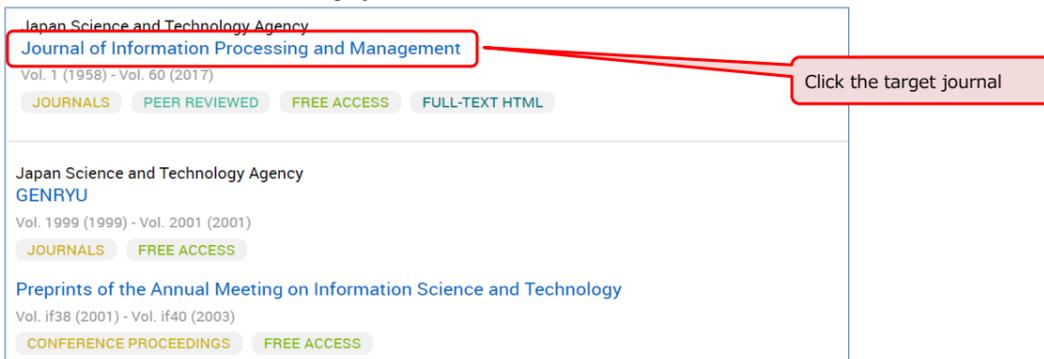

If There is "Japan" at the beginning of the publisher name, please specify the headword of the publisher name excluding "Japan" from the "Japan(ese)Society" column in the lower row. Also, please exclude corporate status such as "general incorporated corporation, national research and development corporation".

In this example, we are targeting Publisher name "Japan Science and Technology Agency", so click on "R-S" in the "Japan(ese)Society" in the lower row.

※ The above example is when you click "All publishers". If you click "All journals", a list by journal title is displayed.

- (2) It moves from the search result to the target journal.

- (3) Next, please click "About the journal".

- (4) Please check the publisher information on "About the journal" screen. ※Depending on the publisher, you need to scroll to the bottom.
