Explore Japan's academic journals

J-STAGE, Japan's preeminent electronic journal platform, publishes approximately half of all academic journals in Japan.

Users can access the full texts of articles and reports in various academic fields, including life sciences, physics, chemistry, engineering, and humanities/social sciences.

J-STAGE promotes open access and provides easy access to a wide variety of full-text academic articles. Among the articles that can be viewed for free, those displaying a Creative Commons (CC) license are available for secondary use under the terms of that license.

Most of the articles published on J-STAGE can be viewed by anyone from anywhere in the world via a PC, tablet, or smartphone.

CiNii Research DOAJ WorldCat Scopus PubMed

J-STAGE works with discovery services and databases, including CiNii, DOAJ, WorldCat, Scopus, PubMed, and Google Scholar.
